

REF.: What's New with **GSW Press**...

Dear Valued Customers and Friends,

We have recently relocated and moved in with our Service Partner Control Imagineering in North Vernon, IN.

Besides handling our Linear Transporter product, Control Imagineering builds controls for all our coil processing equipment and does electrical as well as mechanical service for our lines.

We are successfully working together since 2003 and enjoy growing a better relationship internally and together with our customers with every new project.

Currently we are installing a nice **Compact Feed Line** in Michigan...:

...as well as are starting to get one of our heaviest **Cradle-Straightener-Feeder** machines ready to go to Georgia where it's going to process 20 x \_ inch high-strength materials...:

We are available for your questions, RFQ and concerns 24-7. The best way to staying in touch with us from your side is email: [sales@gswpress.com](mailto:sales@gswpress.com) or phone: 419-733-5230. We will certainly do our best to not loose sight of you!

We look forward to continuing business or establishing new relationships with you!

Representing GSW,

*Benjamin Schwabe*  
General Manager, Sales.
